ESTEBAN CARRIERE

Full-stack Developer

ABOUT ME

Passionate software developer since i was young, having had the opportunity to integrate the 42 School founded by the CEO of Free.
I acquired my skills through many community and society projects.

WORK EXPERIENCE

Mai 2023 - ongoing

Ubike — Analyste developer

Developer in a bike leasing company, modernizing a legacy system into a more structured and optimized model.
Contributed to building four client-specific platforms using Next.js/React, designed based on their needs and powered by a RESTful API in PHP.

January 2022 - mai 2023

CTG Belgium — Consultant Software Engineer at European Commission

ServiceNow development, including designing workflows, forms and user interfaces in ServiceNow, developing scripts and validation rules.

2021-2022

jtp world srl — Software engineer

- Developed a professional messaging service with automated client-side integration using Node.js.
- Designed indexed database architecture with SQL procedures and triggers for 10 applications.
- Built automated solutions and web interfaces with Core PHP, HTML, CSS, JavaScript, and web services.
- Collaborated with a 6-member committee to organize and analyze projects.
- Created a middleware linking RocketChat to an API managing patient data, ensuring GDPR compliance for doctor-patient connections.
- Developed a dashboard for monitoring server statuses, services, and customer tickets.
- Built a fully offline intranet using the Yii2 framework.
